## Introduction

With years of valve design and development experience Parker Hannifin are able to offer the most comprehensive range of instrument hand valves available to users for a wide variety of markets, industries and applications. Now consolidated into one catalogue Parker is able to offer a simplified system of selection and choice for all Instrument applications and installations.

In addition to producing valves and manifolds Parker also makes twin and single ferrule compression fittings A-LOK® and CPI™ which are used extensively in the oil, gas, petro-chem, power, processing and many other industries. Combining these as an integral part of the valve body users can eliminate pipe threaded connections reducing leak paths and avoiding the use of thread sealant, a frequent menace to instrument and system performance.

For higher pressure ratings up to 15,000 psig Parker can now offer their new MPI™ range of compression fittings.

All the valves offered in this catalogue are available with integral compression ends improving system performance, safety factors, size and weight reduction, simplifying installation and ultimately reducing customer costs.

Continuous product development may from time to time necessitate changes in the details contained in this catalogue. Parker Hannifin reserve the right to make such changes at their discretion and without prior notification.

All dimensions shown in this catalogue are approximate and subject to change.

### **WARNING**

FAILURE, IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS AND/OR SYSTEMS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

This document and other information from Parker Hannifin Corporation, its subsidiaries and authorized distributors provide product and/or system options for further investigation by users having technical expertise. It is important that you analyze all aspects of your application and review the information concerning the product or system in the current product catalog. Due to the variety of operating conditions and applications for these products or systems, the user, through its own analysis and testing, is solely responsible for making the final selection of the products and systems and assuring that all performance, safety and warning requirements of the application are met.

The products described herein, including without limitation, product features, specifications, designs, availability and pricing, are subject to change by Parker Hannifin Corporation and its subsidiaries at any time without notice.

### **Offer of Sale**

The items described in this document are available for sale by Parker Hannifin Corporation, its subsidiaries or its authorized distributors. Any sale contract entered into by Parker will be governed by the provisions stated in Parker's standard terms and conditions of sale (copy available upon request).

## Globe style bonnet design for HNV, HGV and VG series

**1. Positive handle retention design** featuring broached square engagement positioned by thread locked grub screw.

**2. "T" bar**

Ergonomically designed for ease of operation. Anti-tamper and lockable devices can be supplied for on site retro-fit.

**4. Gland packing adjuster**

For maximum packing stability and performance, simple and easily adjustable for gland wear compensation.

**6. Valve Bonnet**

Standard construction for maximum pressure rating with replaceable bonnet sealing washer arrangement.

**8. Thrust Bush**

Anti rotational adjustor bush ensures uniform packing compression, maximising pressure tight sealing and limiting cold flow passages.

**10. Bonnet/body washer**

Annealed sealing washer to ensure complete atmospheric leakage and allowing on site retro-fit of bonnets with 100% re-sealing assurance.

For safe reliable and repeatable performance

**3. Dust Cap**

This has a dual purpose, preventing air born debris from contaminating the operating spindle thread and providing colour coded functional identification. Isolate (BLUE).

**5. Gland adjuster lock nut**

A secure anti vibration locking mechanism to prevent inadvertent gland adjuster loosening.

**7. Anti blowout spindle**

Designed for low torque operation with high quality micro mirror stem finish for positive gland sealing.

**9. Gland packing (adjustable)**

Chevron effect dual piece gland packing to provide maximum sealing area contact with minimum gland adjustment.

**11. Spindle tip**

Self centering, non-rotational tip gives successive positive bubble tight shut off assuring the user of leakage free performance and downstream functional safety.

All metallic standard parts are produced in stainless steel, for alternative materials please refer to page 19. Manifolds produced in other specified materials will be provided with non-wetted parts as standard in stainless steel, this applies to items 1, 2, 4, 5 & 8.

### Specification

- Height closed (standard and HP) = 47mm (1.85").  
Height open (standard and HP) = 50.3mm (2.00").
- Number of turns open/close - 3.5.
- Stainless steel construction.
- Maximum standard pressure up to 6,000 psig (414 barg).
- Maximum optional pressure up to 10,000 psig (689 barg). See page 8/9.
- Temperature rating -54C to +538C (-65F to +1000F).
- PTFE standard gland packing (Graphoil optional).
- Maximum temperature PTFE 260C (500F).
- Maximum temperature Graphoil 538C (1000F).

### Features

- Standard unit throughout hand valve range.
- Operating threads outside washout area.
- Externally adjustable gland.
- Low operating torque.
- Alternative 10,000 psig (689 barg) range available.
- Retro-fit kit for:-  
Anti-tamper spindle.  
Panel mounting.  
Lockable T bar.  
Handwheel with lockable option.
- Bonnet locking pin to prevent accidental removal fitted as standard.
- Alternative graphoil packing for high temperature performance available.
- Alternative self centering tip materials available for gaseous and aggressive fluids.
- Safety back seated spindle prevents stem blowout and provides secondary back up stem seal.
- Packing below threads to prevent lubricant washout.
- All valves 100% factory tested.
- NACE compliant wetted parts available.
- Optional cleaned and lubricated suitable for Oxygen service.
- Heat code traceable body and bonnet.

### Pressure vs temperature

⚠ When selecting products for specific applications users should refer to our notice at the bottom of page 3.

## Optional globe style bonnet design for HNV, HGV and VG series

### For on-site assembly

The design options below can be simply retrofit to any NV, GV and VG series standard valves. Retrofit kit part numbers are listed next to the illustrated option and all parts will be supplied in stainless steel regardless of the parent body material.

### For factory fitted assembly

To obtain factory assembled options the valve part number must be suffixed with the option and function designator. Options can be combined:-

**Example HNV\*8FFAT** – NV series valve, factory fitted with anti-tamper (AT) operating mechanism.

**Example HGV\*8THL** – GV series valve, factory fitted with “T” bar locking plate (THL).

Note: Padlocks for lockable handwheels and “T” bars are not supplied (hole size 6mm/0.24”).

Standard bonnet	T bar handle locking	Anti tamper spindle
	 <p>Retro-fit kit part number <b>KITTHL</b> Factory assembled suffix <b>THL</b></p>	 <p>For key only - part no. <b>ATHKEY/1</b> Retro-fit kit part number <b>KITAT</b> without key <b>KITATK</b> with key Factory assembled suffix <b>AT</b> without key <b>ATK</b> with key</p>
Handwheel	Lockable handwheel	*Panel mounting
 <p>Retro-fit kit part number <b>KITHW</b> Factory assembled suffix <b>HW</b></p>	 <p>Retro-fit kit part number <b>KITLHW</b> Factory assembled suffix <b>LHW</b></p>	 <p>Retro-fit kit part number <b>KITPM†</b> Factory assembled suffix <b>PM</b> † Panel mount kit for HP: <b>KITPMHP</b></p>

\*Panel mounting hole diameter = 26mm (1.02").  
Panel thickness = Max 5mm (0.20") Min 2.3mm (.09").

### Globe style bar stock needle valves HNV series (6,000 psig/414 barg)

#### Purpose

Bar stock needle valves are purpose designed valves for operation with any fluid up to 6,000 psig (414 barg) rating. Complete with standard PTFE gland packing and self centering non rotational tip, gives the user assurance of total in service sealing security. For gaseous application soft tipped optional seating is available. A wide variety of end connectors are offered for all types of installation. NACE compliant materials and oxygen clean are also available along with an extensive list of materials of construction.

#### Specification

- Standard seat diameter 4mm.
- Optional seat diameter 6mm.
- Cv: 0.35 standard.
- Maximum standard pressure up to 6,000 psig (414 barg).
- Temperature rating -54C to +538C (-65F to +1000F).
- Port sizes up to 1/2" pipe thread and 1/2"/12mm tube compression ends as standard.  
Optional sizes up to 1" pipe, tube and combination ends can be considered.

#### Features

- Rolled spindle operating threads.
- Stainless steel construction as standard.
- PTFE packing standard, optional graphite.
- Alternative tip and materials of construction available.
- Self centering non rotating spindle tip for bubble tight shut off.
- Colour coded functional identification.
- Back stop spindle for blowout prevention, and minimal atmospheric leakage.
- Low torque operating T bar handle.
- Externally adjustable gland.
- Panel and base mount option.
- Variety of end connections including integral compression one piece bodies.
- Angled versions available.
- Firesafe option available to API 607 BS 6755 Part 2.
- Dust cap to prevent ingress of contamination to operating thread.
- Bonnet locking pin fitted as standard.
- Angled flow path (option).

HNV*M12A	12mm	12mm	76.2 (3.00")	25.4 (1.00")	76.2 (3.00")

\*Insert material code

Notes for compression ended valves:-

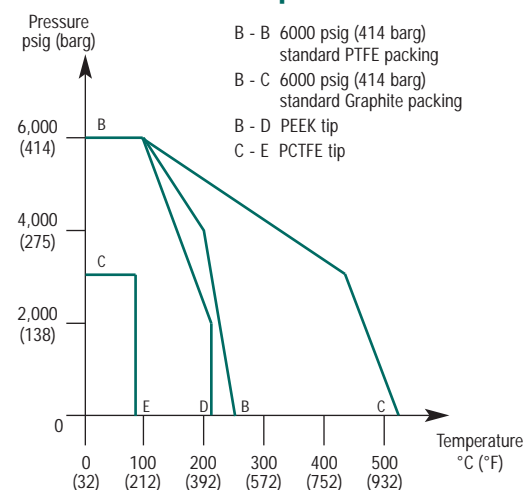

1. For CPI™ change A to Z.
2. "A" dimension given for finger tight nuts and ferrules.
3. Can be offered to comply with latest issue of NACE subject to para. 8.4.1.1.
4. For compression ended valve pressure ratings consult tube ratings table.

Dimension "C" in open position.

Designed to meet pressure/temperature ratings of ANSI Class 2500 where applicable.

For a full list of options and suffix's, see page 18. For a full list of materials and specifications, see page 19.

## Pressure vs temperature

⚠ When selecting products for specific applications users should refer to our notice at the bottom of page 3.

### Globe style bar stock needle valves HNV series (10,000 psig/689 barg)

#### Purpose

Bar stock needle valves are purpose designed valves for operation with any fluid up to 10,000 psig (689 barg) rating. Complete with standard PTFE gland packing and self centering non rotational tip, gives the user assurance of total in service sealing security. For gaseous application soft tipped optional seating is available. A wide variety of end connectors are offered for all types of installation. NACE compliance and oxygen clean are also available along with an extensive list of materials of construction.

#### Specification

- Standard seat diameter 4mm.
- Optional seat diameter 6mm.
- Cv: 0.35 standard.
- Maximum standard pressure up to 10,000 psig (689 barg).
- Temperature rating -54C to +538C (-65F to +1000F).
- Port sizes up to 1/2" pipe thread and 1/2" MPI™ tube compression ends as standard.  
Optional sizes up to 1" pipe, tube and combination ends can be considered.

#### Features

- Rolled spindle operating threads.
- Stainless steel construction as standard.
- PTFE packing standard, optional graphite.
- Alternative tip and materials of construction available.
- Self centering non rotating spindle tip for bubble tight shut off.
- Colour coded functional identification.
- Back stop spindle for blowout prevention, and minimal atmospheric leakage.
- Low torque operating T bar handle.
- Externally adjustable gland.
- Panel and base mount option.
- Variety of end connections including integral compression one piece bodies.
- Angled versions available.
- Dust cap to prevent ingress of contamination to operating thread.
- Bonnet locking pin fitted as standard.

## MPI™ Advanced Features

1. Front ferrule with corrosion-resistant Parker SUPARCASE® forms a tight pressure seal between the body and ferrule in a *second* strong mechanical hold on the tube.
2. Rear ferrule with corrosion-resistant Parker SUPARCASE® provides a strong mechanical hold on the tube.
3. Longer thread area for improved resistance to pressure and load on the ferrules.
4. Molybdenum disulfide-coated inverted nut helps prevent galling, provides easier assembly, and permits multiple remakes.
5. Long tube-support area improves resistance to vibration and line loads.

**Standard product specification:** metal/metal seated, PTFE packed, stainless steel, T bar operation, globe pattern, 10,000 psig (689 barg).

## Standard range part numbers

### H Series rising plug valves (HRPV series)\*

#### Purpose

These unique, high quality, high performance, low torque rising plug soft-seated valves have been specifically designed to perform with fluids containing high levels of contamination frequently found in oil and gas processing facilities. With a straight through flow pattern and giving 100% repeatable bubble tight shut off, the valves as standard when specified with PEEK seat will perform up to 10,000 psig (689 barg) with low spindle operating torques. A variety of end connections are offered for all types of installation. NACE compliance is also available along with an extensive list of materials of construction.

#### Specification

- Standard Orifice size 1/4" (6.4mm)
- Cv = 1.8.
- Maximum standard pressure up to 10,000 psig (689 barg) - PEEK seat.
- Temperature rating PEEK seat maximum 200C.
- Port sizes up to 1/2" pipe thread as standard.

#### Features

- Rolled spindle operating threads.
- 316 Stainless steel construction as standard.
- PTFE packing standard.
- PEEK seat standard.
- Alternative body materials available.
- Straight through flow path.
- Standard multi port gauge style available.
- Bi-directional flow.
- Replaceable soft seat.
- Colour coded functional identification.
- Backstop spindle for blowout prevention and minimal atmospheric leakage.
- Low torque operating T bar handle.
- Externally adjustable gland.
- Full range of head options available.
- Dust cap to prevent ingress of contamination to operating thread.
- Bonnet locking pin fitted as standard.
- Patent(s) pending.
- Other seating materials could be considered for special applications.

\* Patent(s) pending

For a full list of options and suffix's, see page 18. For a full list of materials and specifications, see page 19.

### Multi-port gauge valves (HGV series)

#### Purpose

Parker's Multi-port gauge valves are purpose designed valves for operation up to 6,000 psig (414 barg) and 10,000 psig (689 barg). Complete with standard PTFE gland packing and self centering non rotational tip gives the user assurance of bubble tight seat shut off. For gaseous application soft tipped optional seating is available. A wide variety of connector ends are offered for all types of installations. NACE compliance and oxygen clean are also available along with an extensive list of materials. Each valve has 3 female outlets giving the user optimum selection for instrument positioning and location.

Plug

#### Specification

- Standard seat diameter 4mm (0.16").
- Cv: 0.35 standard.
- Maximum standard pressure up to 6,000 psig (414 barg).
- Maximum optional (HP) up to 10,000 psig (689 barg).
- Temperature rating -54C to +538C (-65F to +1000F).
- Port sizes up to 3/4" pipe thread as standard.

#### Features

- Rolled spindle operating threads.
- Stainless steel construction as standard.
- PTFE packing standard, optional graphite.
- Alternative tip and materials of construction available.
- Self centering non rotating spindle tip for bubble tight shut off.
- Colour coded functional identification.
- Back stop spindle for blowout prevention and minimal atmospheric leakage.
- Low torque operating T bar handle.
- Externally adjustable gland.
- Base mount option.
- Variety of end connections including integral compression one piece bodies.
- Dust cap to prevent ingress of contamination to operating thread.
- Bonnet locking pin fitted as standard.

## To order individual bleed valves (captive spindle) & plugs

Part no.	Description	Connection
		Male
HBV*4M	Bleed valve	1/4" NPT
HBV*8M	Bleed valve	1/2" NPT
4PHSS	Hexagon plug	1/4" NPT
8PHSS	Hexagon plug	1/2" NPT
4PHSS	Hollow hexagon plug	1/4" NPT
8PHSS	Hollow hexagon plug	1/2" NPT

Plug part numbers are from IPD's pipe fitting range.

Designed to meet pressure/temperature ratings of ANSI Class 2500/4500 where applicable. For a full list of options and suffix's, see page 18. For a full list of materials and specifications, see page 19.

### Single port gauge valves with vent (HVG series)

#### Purpose

Parker's Single port gauge valves with vent are purpose designed valves for operation with any fluid up to 6,000 psig (414 barg) rating. Valves are provided with a single 1/4" NPT port for the optional fitting of captive bleed/vent valve or blank plug. Complete with standard PTFE gland packing and self centering none rotational tip gives the user assurance of total in service sealing security. For gaseous application soft tipped optional seating is available. A wide variety of end connectors are offered for all types of installations. NACE compliance and oxygen clean are also available along with an extensive list of materials of construction.

Plug

#### Specification

- Standard seat diameter 4mm (0.16").
- Cv: 0.35 standard.
- Maximum std. pressure up to 6,000 psig (414 barg).
- Temperature rating -54C to +538C (-65F to +1000F).
- Port sizes up to 1/2" pipe thread and 1/2"/12mm tube compression ends.

#### Features

- Rolled spindle operating threads.
- Stainless steel construction standard.
- PTFE packing standard, optional graphite.
- Alternative tip and materials of construction available.
- Self centering non rotating spindle tip for bubble tight shut off.
- Colour coded functional identification.
- Back stop spindle for blowout prevention and minimal atmospheric leakage.
- Low torque operating T bar handle.
- Externally adjustable gland.
- Base mount option.
- Variety of end connections including integral compression one piece bodies.
- Firesafe option available to API 607 BS 6755 Part 2.
- Dust cap to prevent ingress of contamination to operating thread.
- Bonnet locking pin fitted as standard.

## Part description

Item	Description
1	Locked grub screw
2	T bar handle assembly

\*Insert material code - select from material matrix on page 19.  
Dimension "C" in open position.

## To order individual bleed valves (captive spindle) & plugs

Part no.	Description	Connection
		Male
HBV*4M	Bleed valve	1/4" NPT
4PHSS	Hexagon plug	1/4" NPT
4PHSS	Hollow hexagon plug	1/4" NPT

Plug part numbers are from IPD's pipe fitting range.

Designed to meet pressure/temperature ratings of ANSI Class 2500 where applicable.  
For a full list of options and suffix's, see page 18. For a full list of materials and specifications, see page 19.

## Pressure vs temperature

⚠ When selecting products for specific applications users should refer to our notice at the bottom of page 3.

### Outside screw and yoke globe pattern needle valves (HYNV series)

#### Purpose

Outside screw and yoke valves are designed for primary isolating applications operating up to 6,000 psig (414 barg) with optional 10,000 psig (689 barg) rating. The valve is supplied complete with standard graphite gland packing and the self centering non rotational tip gives bubble tight sealing. For gaseous application soft tipped optional seating is available. A wide variety of connector ends are offered for all types of installations including multi-ported root/primary isolate service. NACE compliance and oxygen clean are also available along with an extensive list of materials. Firesafe to BS 6755 Part 2 and API 607 standard with graphite packing.

#### Specification

- Standard seat diameter 4mm (0.16").
- Cv: 0.35 standard.
- Maximum standard pressure up to 6,000 psig (414 barg).
- Maximum optional pressure up to 10,000 psig (689 barg).
- Temperature rating -54C to +538C (-65F to +1000F).
- Port sizes up to 1/2" pipe thread and 1/2"/12mm tube compression ends as standard.

#### Features

- Rolled spindle operating threads.
- Stainless steel construction standard.
- Graphite packing standard, PTFE optional.
- Alternative tip and materials of construction available.
- Self centering non rotating spindle tip for bubble tight shut off.
- Colour coded functional identification.
- Back stop spindle for blowout prevention.
- Externally adjustable gland independent of spindle thread.
- Base mount option.
- Variety of end connections including integral compression one piece bodies.
- Angled versions available.
- Firesafe design and verified by testing to BS 6755 Part 2 and API 607.

## Part description

Item	Description
1	Body
2	Thrust bush
3	Stem packing
4	Dust cap
5	Stem
6	Tip
7	Grub screw
8	Joint seal
9	OS&Y bonnet
10	Gland bridge
11	Gland adjuster
12	Tri-lobal handle
13	Bonnet - gland stud
14	Body - bonnet stud
15	Nuts

**Standard product specification:** metal/metal seated, Graphite packed, stainless steel, T bar operation, inline pattern, 6000 psig (414 barg).

## Standard range part numbers

Part no.	Inlet		Outlet		Dimension		
	Female	Female	A mm (inch)	B mm (inch)	C mm (inch)

\*Insert material code - select from material matrix on page 19.

Notes for compression ended valves:-

1. For CPI™ change A to Z.
  2. "A" dimension given for finger tight nuts and ferrules.
  3. Cannot be offered for NACE.
  4. For compression ended valve pressure ratings consult tube ratings table.
- Dimension "C" in open position.

For a full list of options and suffix's, see page 18. For a full list of materials and specifications, see page 19.

## Pressure vs temperature

⚠ When selecting products for specific applications users should refer to our notice at the bottom of page 3.

†For tube socket or tube butt weld use 1/16 inch denominations and change NB to TB.

†For metric tube size use actual metric (mm) dimensions e.g. SW12MMTB.

Note: Heat code traceable certificates for body and bonnet stud available on application.

\*\*Does not apply for A-lok/CPI ended valves in 316 stainless steel.
